

Valiance Partners

Valiance Partners is a software, data migration, and quality assurance company specializing in content intensive and regulated business environments.

Valiance TRUcompare[®] is an automated testing product that speeds the verification of data and/or content migrated from one or more sources to a destination application.

With TRUcompare, the familiar but highly iterative and labor-intensive sampling techniques and procedural trial and error approaches to migration testing and validation are now obsolete. Instead, TRUcompare rapidly tests 100% of migration results and reports any errors or deviations from its specification.
